

We have been developing JSN Epic for **more than 2 years** and that tremendous amount of time allowed us to roll out some really advanced stuff. For us, the word “advanced” is not just fancy marketing buzz, but really something that you will not likely see anywhere else.

RTL Layout Support

All JoomlaShine templates are equipped with **native RTL layout support**. We spent huge amount of time tweaking every tiny details of the template to make it look absolutely awesome in RTL mode.

[Read more about RTL layout support](#)

IE6 Support

Each template is processed thoroughly based on the [ultimate IE6 cheatsheet](#) covering 25+ IE6 bugs. This is really time and resource consuming process, but the result is worth every second spent.

SEO & Accessibility

One of the most important SEO technique is to make sure that search engine can find your critical content before others. So we layout content in order “center”, “left” and “right”.
